

The New York State Department of Health's Division of Family Health administers the Title V Maternal and Child Health Services Block Grant in New York State. The Title V program supports activities designed to improve the health status of women, particularly those of reproductive age, infants, children and adolescents, including those with special health care needs. Funds support public health infrastructure, population-based services, enabling services, and gap-filling direct medical services for those with limited access to high-quality health care. The Division of Family Health encompasses four bureaus and multiple programs. Bureaus include: The Bureau of Child and Adolescent Health, the Bureau of Dental Health, the Bureau of Women's Health, and the Bureau of Early Intervention. The Division also provides leadership and direction for State Systems Development Initiative (SSDI), the American Indian Health Program, the Asthma Coordinator, the MCH Graduate Assistantship Program, and the Migrant and Seasonal Farmworker Health Program.
